

# Superior Performance in Overnight Oximetry

For the most reliable clinically actionable data, the WristOx<sub>2</sub><sup>™</sup>, Model 3150 is the ideal choice for overnight assessment of chronic breathing disorders such as COPD and pre-screening for sleep breathing disorders such as OSA. Engineered with Nonin Medical's proven PureSAT<sup>®</sup> SpO<sub>2</sub> technology, the WristOx<sub>2</sub><sup>™</sup>, Model 3150 delivers highly accurate readings in the widest range of patient populations and settings. From the lab to the home, it is ideal for applications ranging from daily activity monitoring to overnight studies—providing the versatility and reliability that clinicians expect from Nonin Medical.

## Maximum Versatility for Unmatched Value

Clinicians have come to expect industry-leading accuracy from Nonin, and the WristOx<sub>2</sub><sup>™</sup>, Model 3150 delivers. No matter the patient or setting, the WristOx<sub>2</sub><sup>™</sup>, Model 3150 provides proven accuracy for dependable measure in the most challenging conditions such as motion and low perfusion. For reliability in continuous monitoring situations, the WristOx<sub>2</sub><sup>™</sup>, Model 3150 features advanced performance benefits such as significant memory storage and highly efficient power use. With up to 1,080 hours of non-volatile data storage, that is secure even if power is lost, the WristOx<sub>2</sub><sup>™</sup>, Model 3150 boasts variable sampling rate options of one, two and four seconds—ensuring appropriate sensitivity to capture rapid changes in oxygen saturation. And, as a highly efficient solution, it runs up to 48 hours on two AAA batteries.

## Simple Operation Saves Time to Deliver Reliable Results the First Time

No patient programming required! To ensure reliable data collection on the first try, simple operation with minimal need for device training makes overnight monitoring easy for patients and clinicians. Clinicians save valuable training time and minimize the risk of set-up errors by pre-programming the device before sending it home. And with automatic ON/OFF functionality, patients simply attach it to their wrist, put their finger in the sensor and go to sleep as they normally would. For further time savings, the WristOx<sub>2</sub><sup>™</sup>, Model 3150's multiple connectivity options (Bluetooth<sup>®</sup>, USB) make downloading data fast and easy.

## Unrestricted Comfort for Accurate Data Collection

Now, patients can sleep comfortably and fall into their natural sleep patterns to ensure reliable and realistic data collection. The WristOx<sub>2</sub><sup>™</sup>, Model 3150 features a non-intrusive ergonomic design that wears like a wristwatch for maximum comfort. For added freedom during sleep, a short cable running between finger and wrist eliminates the inconvenience/discomfort of lengthy cables—keeping device interference to a minimum.

Wrist-worn Pulse Oximeter

# WristOx<sub>2</sub><sup>™</sup>, Model 3150

The Most Versatile Wrist-worn Pulse Oximeter for Unmatched Performance and Value!

The advanced WristOx<sub>2</sub><sup>™</sup>, Model 3150 is the second generation in Nonin's proven WristOx series

With numerous design and performance enhancements, the WristOx<sub>2</sub><sup>™</sup>, Model 3150 delivers proven accuracy and convenience in the widest range of patient populations and settings.

- **Reliable**  
Proven Nonin PureSAT<sup>®</sup> pulse oximetry technology
- **Durable**  
Extremely rugged construction and backed by an industry leading 3-year warranty on the device and 2-year warranty on the soft sensor
- **Compact Size**  
71g (2.5 oz) fits conveniently on wrist like a wristwatch
- **Easy to Use**  
Minimal training required with simple operation – simply stick the finger in the sensor
- **Efficient**  
Two AAA batteries provide a minimum of 48 hours of continuous use (minimum 24 hours with Bluetooth<sup>®</sup> wireless continuously on)
- **Enhanced Memory**  
1,080 hours of non-volatile memory at a four-second sampling rate with additional high resolution sampling options of one or two seconds
- **Flexible Connectivity Options with Fast Download Speed**  
Connect to other devices or computers using either USB download cable or Bluetooth wireless technology (up to 100 meter range)
- **Works with nVISION<sup>®</sup> Data Management Software**  
Designed for two-way communication to program the device or download data with Nonin's proprietary software
- **New Sensor Line**  
The new WristOx<sub>2</sub> sensors are exclusively designed for use with the new WristOx<sub>2</sub><sup>™</sup>, Model 3150
- **Made in the U.S.A.**  
Assembled and technical support in the U.S.A.

## 8000SM-WO2 Soft Sensor

WristOx<sub>2</sub><sup>™</sup>, Model 3150  
Wrist-worn Pulse Oximeter

### WristOx<sub>2</sub> Sensor Varieties with Improved Connector Design

Available in Soft (8000SL-WO2, 8000SM-WO2 and 8000SS-WO2 - Large, Medium and Small), Clip (8000AA-WO2), or Flex (8000J-WO2) with disposable FlexiWraps<sup>®</sup>. The medium soft sensor (shown above) that comes standard is perfect for both spot checking and long-term continuous monitoring.
